

Note: There are many answers! You can have a different one and still be right.

Discussion 0

What should you type if...

1) you want to move d.py to directory B and is in D?

```
mv d.py ..
```

2) you want to copy b.py to directory D and is in D?

```
cp ../b.py .
```

3) after moving b.py to directory D, rename it as bulbasaur.py and is in D?

```
mv b.py bulbasuar.py
```

4) you want to create g.py and g.txt in G and and is in B?

```
touch ../C/G/g.txt ../C/G/g.py
```

5) send over all files in directory F to a remote server's ~ and is in A?

(use user@lab.cs.berkeley.edu)

```
scp C/F/* user@lab.cs.berkeley.edu:~/
```

6) remove directory F and all its contents and is in C?

```
rm -r F
```

7) add directories H, I, J inside folder C and is in C?

```
mkdir H I J
```

8) change from directory E to directory A if A's parent is ~?

```
cd ~/A
```

9) change from directory E to directory G?

```
cd ../G
```

10) Now that you've made changes to your directory, draw what the updated diagram would look like.
